EDUCATION

B.P PODDAR INSTITUTE OF MANAGEMENT AND TECHNOLOGY   kolkata, West
Bengal,700052
B.Tech Information Technology *GPA: 8.87*   September 2020 - present

Garh Haripur G.N High School   Garh Haripur, West Bengal
12th science *GPA: 78%*   march 2017 - march 2019

Garh Haripur G.N High School   Garh Haripur, West Bengal
12th *GPA: 78%*   jan 2016 - feb 2017

WROK EXPERIENCE

RnPsoft Pvt ltd   bhubaneswar, Odisha, India
Machine learning intren   nov -2023 - present

- make model for ai news anchor using chatgpt and google tts api , build cool automated api chat bots etc

SKILL

Programming languages:	java , python , c , HTML , CSS , SQL , Mysql
modules & Frame works:	Django , flask , pandas , numpy , skitlearn , matplotlib , tenserflow
concepts & Technology:	OOPS , DBMS , networks , machine learning , web development

PROJECTS

file sharing using QR code *python modeule - pyqr , and ftp protocol from OS module*
https://github.com/aniruddha8972/file-sharing-QR-generator
A file QR code converter is an advanced platform that converts any file into scannable QR codes. This
transforms file-sharing. Now, you can share and access resources seamlessly and efficiently. With just one
scan, anyone can view and download the embedded file straight to their devices.

Voice assistant using python libraries daily trending news reader *goole module , Wikipedia module ,*
os module , pyttxt module   https://github.com/aniruddha8972/voice-assistant
With the use of voice assistants, we can automate the task easily, just give the input to the machine in the
speech form and all the tasks will be done by it from converting your speech into text form to taking out
keywords from that text and execute the query to give results to the user.

Fashion Recomandation System *skitlearn ml modules , NLP*
https://github.com/aniruddha8972/fashion-Recomandation-System
We require a dataset of fashion product data to construct a fashion recommendation engine. We obtained
information about Kurtis from Myntra that we may utilize to develop a Python-based fashion
recommendation engine.

Online Examination System *django ,python , HTML , CSS , Bootstrap*
https://github.com/aniruddha8972/online-examination-system
Online Examination System is a technology-driven way to simplify examination activities like defining exam
patterns with question banks, defining exam timers, objective/ subjective question sections, and conducting
exams using a computer or mobile devices in a paperless manner.

Sybil Attack detection and prevention (ongoing research paper) *cyber security technology* (09/2023
- Present) ongoing project
The Sybil attack in computer security is an attack wherein a reputation system is subverted by creating
multiple identities. A reputation system's vulnerability to a Sybil attack depends on how cheaply identities
can be generated, the degree to which the reputation system accepts inputs from entities that do not have a
chain of trust linking them to a trusted entity, and whether the reputation system treats all entities
identically. As of 2012, evidence showed that large-scale Sybil attacks could be carried out in a very cheap
and efficient way in extant realistic systems such as BitTorrent Mainline DHT.

ACHIEVEMENTS

Intren of the month   RnPsoft
recognize for giving efforts on doing projects in company   nov - 2023
